## EXPERIENCE

---

### Desmar Global Incorporated

May 2025 - August 2025  
Software Consultant Remote  
• Completely revamped company website with modern design elements and multiple language translation service.  
• Worked closely with stakeholders while programming a Next.JS app for product display and company information.  
• Utilized SEO to increase impressions rate by 203% over the course of a month, and by 675% over the course of 5 months and increase ranking in chinese-language searches.

### The Young People's Project

February 2025 - Present  
Fullstack Developer Boston, MA  
• Developed a Next.js website to showcase academic teams, achievements, and student profiles in an engaging format.  
• Designed and implemented database schemas and queries in Supabase to enable team registration and management.

### Coding With Kids LLC.

May 2023 - June 2023  
Coding Instructor Seattle, WA  
• Taught eleven students in fundamental coding concepts using an engaging, project-based curriculum over four weeks.

## PROJECTS

---

### AI-Powered Collector Marketplace UI/UX

February - May 2026  
• Conducted user studies to program an app that offers AI-powered market interpretation while preserving user agency.

### TrailSpecies Wildlife App

September 2025 - December 2025  
• App allowing users to search wildlife species on any Massachusetts trail, encouraging outdoor activity and conservation.  
• In a team of four, acted as a backend programmer, utilizing Supabase to store users, user-made trails, and login system.  
• Developed the TrailGeoAPI Service for quickly returning geospatial ArcGIS data at sub-second speeds.

### Art Arrangement Microservice Web App

October 2023  
• App allowing users to interactively arrange art onto sharable virtual walls, encouraging art-appreciation and expression.  
• Programmed as 5 NodeJS microservices for modularizability, including a database, public voting service, and event bus

### QuickRead News App

February 2023 - April 2023  
• Collaborated in a team of six to create an Android app providing a feed of AI-summarized news stories.  
• Acted as frontend developer, creating the Android App with React Native and advising team members when needed.  
• Coordinated team, delegated tasks, and facilitated communication between frontend and backend teams during sprints.
